Centre de toxicomanie et de santé mentale

DO YOU HAVE BIPOLAR DISORDER?
IS YOUR MOOD ELEVATED?
DO YOU FEEL 'HIGHER THAN NORMAL?'
ARE YOU OVER 60 YEARS OLD?

Investigators at the Geriatric Mental Health Program, Centre for Addiction and Mental Health, are conducting a study for which you may be eligible.

You may be eligible if you:

- are 60 years of age or older
- suffer from Bipolar Disorder (Manic Depression)
- currently have an elevated mood

Study Requirements:

- the study will last 9 weeks.
- you will receive treatment with a mood stabilizer, either Lithium or Divalproex (Epival). You will have an equal chance (50/50 chance) of receiving either medication.

If you are able to participate:

- you will receive a thorough assessment of your mood
- you will be compensated for your time and will be reimbursed for travel.
- you will not be charged for participation in this study.
